INDEX GENERALIS.

Verschillende lettersoorten werden gebruikt om bepaalde categoriën van plantennamen aan te duiden. De namen dezer categoriën komen in het onderstaande lijstje voor, gedrukt met het lettertype, waarmede de tot hen behorende plantennamen in den index zijn gedrukt.

1. GASTHEEREN UIT ALLE PLANTENGROEPEN. ALS GEBRUIKELIJK BESCHOUWDE NAMEN.
2. GASTHEEREN UIT ALLE PLANTENGROEPEN. ALS SYNONIEMEN BESCHOUWDE NAMEN.
3. Gasten, uitsluitend Fungi. Als gebruikelijk beschouwde namen.
4. Gasten, uitsluitend Fungi. Als synoniemen beschouwde namen.
5. FAMILIES.
6. ONDERFAMILIES.

De bewerking van den index heeft een zeker aantal fouten aan het licht gebracht, die onvermijdelijk waren in een werk als deze Enumeratio. Schrijf- en drukfouten konden worden verbeterd, ook een aantal ontbrekende auteursnamen kon worden toegevoegd. Echter bleken een aantal onregelmatigheden in het gebruik der auteursnamen voor te komen, die hier uit den aard der zaak niet konden worden verbeterd, omdat daarvoor een hernieuwde, soms uitgebreide studie ware noodig geweest. Deze onregelmatigheden zijn het gevolg deels van fouten in de citaten, deels van een verschil van inzicht in de toepassing van de nomenclatuur, deels ook van het feit, dat verschillende auteurs verschillende Fungi onder denzelfden naam hebben beschreven.

Tenslotte zij de uitnemende hulp vermeld door mevr. C. PAERELS-STEUERWALD verleend bij het in orde brengen van het handschrift.

On s'est servi de caractères d'imprimerie différens pour désigner parmi les noms de plantes des catégories différentes. Les noms de ces catégories sont imprimés dans la liste suivante avec le caractère même avec lequel se présentent dans l'index les noms de plantes y appartenant.

1. PLANTES HOSPITALIÈRES DE TOUS LES GROUPES DE PLANTES. NOMS CONSIDÉRÉS COMME USUELS.
2. PLANTES HOSPITALIÈRES DE TOUS LES GROUPES DE PLANTES. NOMS CONSIDÉRÉS COMME SYNONYMES.
3. Plantes recevant l'hospitalité, exclusivement Fungi. Noms considérés comme usuels.
4. Plantes recevant l'hospitalité, exclusivement Fungi. Noms considérés comme synonymes.
5. FAMILLES.
6. SOUS-FAMILLES.

La révision de l'index a mis au jour un certain nombre de fautes, inévitables dans un travail du genre de l'Enumeratio. On a pu corriger des lapsus et des fautes d'impression, ajouter aussi plusieurs noms d'auteurs qui manquaient. Cependant il se présenta dans l'emploi des noms d'auteurs un certain nombre d'irrégularités, qui ne pouvaient naturellement pas être corrigées ici, parce que cela aurait nécessité une étude renouvelée, qui parfois eût été bien vaste. Ces irrégularités résultent en partie de fautes se trouvant dans les citations, en partie d'une différence de conception dans l'application des règles de la nomenclature, en partie enfin du fait que quelques auteurs ont décrit sous la même dénomination des fungi différents.

Qu'il nous soit enfin permis de citer l'inestimable service prêté par Madame C. PAERELS-STEUERWALD dans la mise au point du manuscrit.

Verschiedene Typen wurden benützt um, bestimmte Kategorien von Pflanzennamen anzudeuten. Die Namen dieser Kategorien findet man in der unterstehende Liste und zwar gedruckt mit den Typen, welche für die zu ihnen gehörenden Pflanzennamen im Index benützt wurden.

1. WIRTE AUS ALLER PFLANZENGRUPPEN. ALS GEBRÄUCHLICH BETRACHTETE NAMEN.
2. WIRTE AUS ALLER PFLANZENGRUPPEN. ALS SYNONIEME BETRACHTETE NAMEN.
3. Gäste, ausschlieslich Fungi. Als gebräuchlich betrachtete Namen.
4. Gäste, ausschlieslich Fungi. Als Synonieme betrachtete Namen.
5. FAMILIEN.
6. UNTERFAMILIEN.

Die Bearbeitung des Index hat eine gewisse Anzahl Fehlern an's Licht gebracht, welche unvermeidlich waren in eine Arbeit wie diese Enumeratio. Schreib- und Druckfehler konnten verbessert werden, auch eine gewisse Anzahl von fehlenden Autornamen konnte hinzugefügt werden. Es zeigte sich jedoch dasz eine gewisse Zahl von Unregelmässigkeiten in der Benützung der Autornamen vorkam, welche hier selbstverständlich nicht verbessert werden konnten, weil dazu ein neues, bisweilen

ausführliches Studium notwendig gewesen wäre. Diese Unregelmässigkeiten sind die Folge teils von Fehlern in den Zitaten, teils von Meinungsverschiedenheiten die Regeln der Nomenklatur betreffend, teils auch davon, dass verschiedene Autoren tatsächlich verschiedene Fungi unter demselben Namen beschrieben haben.

Schliesslich sei hier die ausgezeichnete Hilfe gedacht, welche Frau C. PAERELS-STEIERWALD bei der Fertigstellung der Handschrift geleistet hat.

Different sorts of types were used for indicating special categories of plant-names. The names of these categories occur in the following table, printed in the sort of type, which was used in the index for the plant-names belonging to them.

1. HOSTS BELONGING TO ALL GROUPS OF PLANTS. NAMES CONSIDERED AS USUAL ONES.
2. HOSTS BELONGING TO ALL GROUPS OF PLANTS. NAMES CONSIDERED AS SYNONYMS.
3. Guests, exclusively Fungi. Names considered as usual ones.
4. Guests, exclusively Fungi. Names considered as synonyms.
5. **FAMILIES.**
6. **SUBFAMILIES.**

In preparing the index a certain number of mistakes is come to light, which were unavoidable in a work like this Enumeratio. Slips of the pen and misprints could be corrected, a certain number of names of authors, which were wanting, could also be added. Nevertheless there appeared a certain number of irregularities in the use of the names of authors, which could not be corrected here, because for this purpose a renewed, often extensive study would have been necessary. These irregularities are the consequences partly of mistakes in the citations, partly of different opinions with respect to the application of the rules of nomenclature, partly again of the fact that different authors have described different Fungi under the same name.

Finely the valuable assistance of Mrs. C. PAERELS-STEIERWALD may be mentioned with respect to the preparation of the manuscript.
